

	<p>STEM IV</p> <p>Syllabus</p>	
--	--------------------------------	--

STEM: an educational concept that joins multiple disciplines into a single idea.

Course Description: STEM IV is a student based enterprise in which students will work in production based activities. STEM IV encompasses the skills in previous STEM classes and applies them to real world entrepreneurship. Students will maintain and run “Soundwaves”, a production team featuring custom graphics, commercials, and program promotions. Students will also create and design custom apparel through “STEMsthetics”.

Topics to be covered in STEM: Foundations

- **SAFETY** in the work setting (revisit)
- Proper use of basic tools (revisit)
- Video Editing
- Camera Operation
- Drones
- Sewing
- Entrepreneurship
- Marketing

Projects will be graded with the use of project-specific rubrics

Supplies to be provided by student:

- Your mind
